

Mekorma MICR Canadian Payroll for Microsoft® Dynamics GP
Release Notes Version 11.0
Copyright (C) 2010, Mekorma, All Rights Reserved.

What's New

Version 11.0 b11

Fixed an issue with the withholding deduction and benefit array fields not showing all of the line items.

Version 11.0 b9R2

In this build, we fixed an issue with the **YTD Tax Return::Taxable Benefits** field not updating on the first payroll run. This build is only compatible with the Microsoft Dynamics Round 2 (R2) Canadian Payroll tax update.

Version 11.0 b8

In this build, we updated Mekorma MICR for Canadian Payroll to be compatible with the changes implemented in the 2010 Canadian Payroll Year-End/2011 Tax Update Round 1 for Microsoft Dynamics GP.

Version 11.0 b7

Fixed an issue with the earning array so that every line item prints, instead of just the last item on the list printing.

Version 11.0 b06

In this build, we modified Mekorma MICR for Canadian Payroll to be compatible with changes in the Microsoft Dynamics GP 2010 Mid Year Tax Update; specifically, where the Payment Details Earnings Units amount showed 2 more decimal places, for example, 800.00 instead of 8.00.

Version 11.0 b05

This release is compatible with Microsoft Dynamics GP 2010.
