

Mekorma MICR Canadian Payroll for Microsoft® Dynamics GP
Release Notes Version 10.0
Copyright (C) 2010, Mekorma, All Rights Reserved.

What's New

Version 10.0 b25

Fixed an issue with the withholding deduction and benefit array fields not showing all of the line items.

Version 10.0 b23R2

In this build, we fixed an issue with the **YTD Tax Return::Taxable Benefits** field not updating on the first payroll run. This build is only compatible with the Microsoft Dynamics Round 2 (R2) Canadian Payroll tax update.

Version 10.0 b22

In this build, we updated Mekorma MICR for Canadian Payroll to be compatible with the changes implemented in the 2010 Canadian Payroll Year-End/2011 Tax Update Round 1 for Microsoft Dynamics GP.

Version 10.0 b21

Fixed an issue with the earning array so that every line item prints, instead of just the last item on the list printing.

Version 10.0 b20

In this build, we modified Mekorma MICR for Canadian Payroll to be compatible with changes in the Microsoft Dynamics GP Round 5 Tax Update; specifically, where the Payment Details Earnings Units amount showed 2 more decimal places, for example, 800.00 instead of 8.00.

Version 10.0 b19

This build includes Print Engine 2.0. The print engine launches the Mekorma Check Printing window (this is an updated version of what was formerly the Mekorma Print Job Setup window), which gives users a variety of different printer, check stub and copy options to use when printing checks.

Fixed an issue when printing or previewing Canadian Payroll, a warning message displayed stating that the Canadian Payroll stub does not match the Payroll product.

Version 10.0 b10

Fixed an issue with the YTD fields populating with incorrect information.

Version 10.0 b9

Fixed an issue with the Gross Earning **YTD Tax Return::Taxable Income** field not printing properly.

Version 10.0 b8

- * This build is compatible with the 2008 Canadian Payroll July Tax Update for Microsoft Dynamics GP 10.0.
- * This build includes the Configurator Global Setup feature, designed to work with Mekorma MICR Version 10.0 B33 and above. For more information about this feature, please see your Mekorma MICR User Guide.pdf located in the **Mekorma MICR** folder of your Dynamics GP launch directory.

Version 10.0 b7

2007 Canadian Payroll Year-End Compliance and 2008 Tax Update for Great Plains.

Version 10.0 b6

Fixed an issue in the employee details category where the employee Employee::Employee ID field was being populated with the Employee Last Name instead of the Employee ID.

Version 10.0 b5

- * Suppressed the tax credits warning that states "No Federal (CA) Tax Credits is found for x". This warning displays when printing MICR for Canadian Payroll cheques.
- * Fixed an issue in the employee details category where the employee Employee::Employee ID field was being populated with the Employee Last Name instead of the Employee ID.

Version 9.0 b13

IMPORTANT NOTE: If you are installing Mekorma MICR for Canadian Payroll Version 9.0 b13, you must be running Mekorma MICR Version 9.0 B18 or greater, and you will need to re-run the Mekorma MICR table upgrade process. Please see the *Mekorma MICR for Canadian Payroll User Guide.PDF* for information on updating MICR tables.

- * Compliance with Great Plains GP 9.0 (Round 2) 2006 Canadian Payroll Year-End and 2007 Tax update.
- * Added Individual Date fields.
- * Mekorma MICR Setup (Payroll - Canada) can be opened from main menu (Tools -> Setup -> Payroll - Canada -> Mekorma MICR Canadian Payroll Setup -> Mekorma MICR Setup).

* Added the Payment Summary::Net Pay Words field.
